

Project Milestone 3: Midterm Presentation

Team Number: 011-5

Team Members: Nancy Yoder, Jordan Evans, Tucker Travins, Rocky Erdenebat, Quinn Guerin

What features were completed?

- Front End
- Styles
- Dummy Data
- Login w Backend
- Html pages
- Nav Bar

What worked during the demo?

- Login and Signup, Nav bar, html pages, Vue,

What issues were faced either during the development or during the demo?

- Php wasn't working correctly, and neither was Nodejs after trying to implement that.
- The Html Formatting wasn't consistent, some of the cards didn't work properly.

What were the suggestions offered by the TA?

- We were suggested to use grids for html for columns and rows
- Make sure there is an authorization for login(Which we do have)

Individual contributions by each team member

- Jordan - HTML for profile, CSS on all pages, navbar on all pages, js styling on view all
- Quinn - Login, Register, Vue Integration
- Rocky - Navbar, Basic website database implementation of php
- Tucker - Javascript & HTML for property list (viewall.html/js) and for review list (property.html/js) so it can easily interface with sql once we add that. Also spacing/sizing for those pages.
- Nancy - HTML for create review, CSS on all pages, SQL database implementation in Vue, create review form
